n8n | Make.com | Webhooks | REST APIs | Supabase | JavaScript

Voice & Conversational AI

Vapi | Voiceflow | AI Chatbots | Lead Qualification Agents

Tools & Platforms

GitHub | Anthropic API | Open Router | Next.js

EXPERIENCE

Agentic Systems Developer & AI Automation Specialist | Remote

2024 – Present

— International Clients

- Designed and deployed 200+ production-grade agentic workflows for clients across e-commerce, SaaS, and service businesses, automating lead capture, invoicing, customer support, and data processing pipelines.
- Built AI voice agents using Vapi and Voiceflow to handle inbound calls, qualify leads, and book appointments autonomously with 24/7 uptime and zero human intervention.
- Integrated Claude Code and OpenAI models into multi-step business workflows enabling intelligent document parsing, automated decision-making, and agentic task execution.
- Architected RAG pipelines and AI research agents connecting Supabase, n8n, and external APIs to deliver context-aware, scalable automation solutions.
- Developed MCP server integrations connecting Claude to client tools including Notion, Slack, GitHub, and custom databases, eliminating manual data handoffs.
- Delivered an average of 85% reduction in manual work per client engagement, saving clients \$2,000+ per month in operational costs.

SEO Specialist & Web Developer | ScreenOrbit.com - Independent

2023 – 2024

Project

- Achieved Domain Rating 7 and a number 1 Google ranking for competitive keywords through technical SEO, on-page optimization, and content strategy.
- Built and maintained full site architecture demonstrating cross-functional web development and API integration capabilities.

KEY PROJECTS

ApePublish *Next.js 14 | OpenRouter | Multi-Agent Architecture*

- Founded and launched a live AI content repurposing SaaS. Transforms long-form content into full multi-platform social media campaigns using a specialized multi-agent pipeline with brand voice sync.
- Built 12+ specialized AI agents for content calendar planning, carousel generation, LinkedIn and thread optimization, cold DM writing, and direct X and LinkedIn publishing integrations.
- Implemented Performance DNA system that analyzes top-performing posts to identify winning hook patterns and feeds insights back into the generation engine for closed-loop learning.

AIFLOXIUM — AI Automation Portfolio *Claude Code | n8n | Antigravity | Supabase | MCP*

- Founded and launched a client-facing AI automation agency. Full service infrastructure and workflow delivery pipeline built entirely with open-source tooling at zero cost.
- Portfolio houses 200+ production workflow case studies across four domains: business and support agents, RAG and research agents, SEO automation, and social media AI pipelines.

Claude Code Skills Library *Claude Code | Anthropic | Prompt Engineering*

- Custom Claude Code skill library featuring a LinkedIn Post Creator with competitor analysis, 50+ proven hooks, content calendar, and multi-platform publishing pipeline.
- Includes production skills for code review automation, client reporting generation, and deployment checklists that auto-load on context match.

Richei AI Chatbot *Voiceflow | LLM | n8n*

- Intelligent customer assistant with automated lead qualification and calendar booking. Achieved 100% lead capture rate with full 24/7 availability.
- Integrated with Google Calendar and CRM via n8n webhooks for seamless appointment management and follow-up automation.
